

MARY  
SEACOLE  
PROGRAMME

## About the programme

The Mary Seacole Programme is a six month leadership development programme which was designed by the NHS Leadership Academy in partnership with global experts, the Hay Group, to develop knowledge and skills in leadership and management.

The £995 investment goes directly back into the NHS, through your development, ensuring that all healthcare staff become the best leaders they can possibly be to ultimately make a real and improved difference to patient experience and care.

Designed for those looking to move into their first formal leadership role, it empowers people to turn their success into consistent team success and to champion compassionate patient care.

" It provided me with a template and coaching to approach different situations. As a result of what I learnt, we redesigned the treatment process, delivering a much more co-ordinated service for patients, reducing delay and confusion."

Gerry Trillana  
Senior clinical research nurse, NIHR Clinical Research Facility for  
Experimental Medicine at Guy's Hospital, London
